

Your In-Platform AI Assistant

Secure, Generative Artificial Intelligence for Grantmakers

THE CHALLENGE:

Grantmakers increasingly see the value of generative AI, but using it securely and effectively is a challenge. Public AI tools raise privacy concerns, require extra subscriptions, and live outside your grantmaking workflow. That means missed opportunities for efficiency and collaboration.

FLUXX'S ANSWER: FINN

Finn is your secure, in-platform AI assistant that helps you draft, summarize, brainstorm, and more all without leaving Fluxx. Powered by Claude 3.0 Haiku via Amazon Bedrock, Finn delivers the utility of a paid ChatGPT-style tool inside your secure Fluxx environment. With permission-based access, privacy-first design, and the flexibility to support a range of grantmaking tasks, Finn saves time while keeping you in control.

WHY YOU'LL LOVE IT

- **Generative AI Inside Fluxx:** Get the power of a paid generative AI tool without leaving your secure Fluxx environment
- **Secure by Design:** Built on Claude 3.0 Haiku via Amazon Bedrock — your data stays private, encrypted, and never trains external models
- **No Extra Subscriptions:** Fully embedded in Fluxx — no additional tools, logins, or browser tabs
- **Permission-Based Access:** You control exactly who can use Finn, with role-based permissions built in
- **Multilingual Interactions:** Finn speaks 11 languages - English, Arabic, German, Spanish, French, Italian, Dutch, Russian, Ukrainian, Vietnamese, and Simplified Chinese — offering broad support for global grantmaking conversations
- **Flexible Utility:** Draft, refine, summarize, brainstorm, or explore ideas for virtually any stage of the grantmaking process

WHAT MAKES FINN DIFFERENT:

- **Purpose-Built for Grantmakers:** Designed around the real workflows and communication needs of funders
- **Secure by Design:** Built on Claude 3.0 Haiku via Amazon Bedrock
- **Opt-In and Permission-Based:** Control who can access Finn within your organization
- **Privacy-First AI:** PII like emails, SSNs, and bank account numbers are automatically masked before processing
- **Human-in-the-Loop:** With Fluxx, AI assists, but you make the decisions

BUILT WITH YOUR GRANTMAKING NEEDS IN MIND

Private Foundations

- **Messaging to leadership:** shape clear, concise updates for senior staff
- **Board meeting writeup:** create a briefing-style summary to prepare Board members for upcoming topics or decisions
- **Message to a grantee:** craft respectful, clear communication to a grantee organization
- **Reminder to submit reviews:** draft friendly, actionable reminders to reviewers
- **Summarize Board meeting notes:** produce a concise recap of key decisions and discussions

Public Charities

- **Donor briefing from program update:** convert a field report or update into something shareable with funders
- **Internal summary of a community event:** reflect on outreach or engagement events for internal teams
- **Talking points for cross-sector partner meetings:** prepare for calls with healthcare, government, or education partners

Public Sector Organizations

- **Federal grant compliance checklist:** turn complex federal guidance into a concise checklist
- **Interpret a government funding clause:** translate dense grant language into plain English (or another supported language)
- **Audit justification paragraph:** draft clear rationales for programs or purchasing decisions
- **Compliance vs. eligibility:** clarify this often-confused distinction for grants administration

RESULTS YOU CAN COUNT ON

- Reduce privacy and compliance risks inherent in public AI tools
- Save time on repetitive drafting and summarization tasks
- Improve clarity and consistency in communications
- Faster turnaround on internal and external messaging

SECURITY & TECHNICAL SPECS

- **Model:** Claude 3.0 Haiku (Anthropic)
- **Hosting:** Amazon Bedrock within Fluxx's secure AWS environment
- **Encryption:** All data encrypted in transit and at rest
- **No External Training:** Data never leaves your environment or trains the model
- **Chat Context:** Last 50 messages (user + Finn) are used for context
- **PII Masking:** Sensitive identifiers automatically masked

READY TO SEE FINN IN ACTION?

- **Start using secure, in-platform generative AI today** — right where your grantmaking happens. If you're a Fluxx user, enable Finn in your system and put AI to work instantly. If you're exploring new solutions, discover how Finn and the Fluxx platform can streamline your processes from day one.
